

J/24 Rig Tension Guide

(Using a Loos B Gauge)

Wind Strength in Knots:	0-5	5-10	8-12	10-14	14-18	18-22 (Blade)	22+
Shroud Tensions							
Uppers:	20	23	24	27	29	29	29
Lowers:	15	18	20	24	30	32	34

You will have to determine how many turns it will take to get from one setting to another. This depends on the types of turnbuckles you have. We recommend making your own chart and counting turns from the lowest setting to the highest. This will allow you to change settings quickly and accurately between races.
